A depth of research expertise with a long track record of innovation.

University of Michigan

#1 public university in U.S. research spending

The U-M Medical School offers a depth of research expertise with a long track record of innovation, and our scientists continue to be at the forefront of pioneering research that significantly impacts human health.

- $7+ billion endowment
- $1.33+ billion total research
- #1 public university in U.S. research spending
- 451 endowed chairs
- 97 National Academy Members
- 439 new invention disclosures

U-M MEDICAL SCHOOL

- $474 million sponsored awards to support research
- 130+ biomedical invention disclosures per year
- 1.6+ million square feet laboratory space
- 23 Howard Hughes Medical Institute Fellows
- 53 Institute of Medicine Members

$474 million sponsored awards to support biomedical research

A significant economic engine in the region and a leading research enterprise in the United States, the University of Michigan is committed to becoming the country’s largest hub of university-based health researchers with operations featuring…

- three hospitals and over 40 Health Centers.
- more than 2 million patients served each year.
- 1,300+ active clinical trials with thousands of enrolled patients.
- Michigan Institute for Clinical and Health Research (MICHR), an NIH Clinical Trial Science Awardee supporting translational research and clinical trials.

The entire University of Michigan Health System has aligned around the Strategic Research Initiative, a common research vision backed by a long-term commitment of $100+ million by the Dean of the Medical School.
With a focus on commercialization via Fast Forward Medical Innovation, as well as investments in infrastructure and the Host Microbiome and Protein Folding Diseases programs, the Strategic Research Initiative is “fast forwarding” science at the U-M Health System and helping shape the future of human health and global healthcare policy.
