Your support for these key strategies will accelerate biomedical innovation and shape the future of human health.

**INNOVATION NAVIGATOR**
Concierge services that fund, mentor, and nurture early-stage biomedical projects.

**COMMERCIALIZATION EDUCATION**
Training researchers in business best practices and entrepreneurship.

**SEED & VENTURE FUNDS**
Nurturing fledgling U-M startups, investing in them at an early stage and enhancing their attractiveness for external venture funding.

**Fast Forward Medical Innovation**
Aims to dramatically increase the impact of University of Michigan medical innovations and technologies on human health.

By focusing and expanding on the university’s strengths in biomedical research, bridging the divide between academia and industry, and accelerating the path to commercialization, we will ignite a powerhouse of biomedical innovation for generations to come.
